BUSINESS: Caterpillar Incorporated is the world's largest producer of earthmoving equipment. Major global markets include road building, mining, logging, agriculture, petroleum, and general construction. Products include tractors, scrapers, compactors, loaders, offhighway truck engines, and pipelayers. Also makes diesel \& turbine engines and lift trucks. Foreign sales $59 \%$ of total; research \& de-
Operating conditions appear to be sound for Caterpillar. In fact, most end markets continue to gain strength, and order rates and backlog remain at healthy levels. Amid strong global demand and U.S. tariffs, however, the price of various metals (steel has risen nearly 30\% this year) has surged. Wall Street is concerned that trade frictions will remain at the forefront. In order to offset higher input costs, the company continues to rely on price hikes. We are not sure this is a sustainable policy since the manufacturer sells to certain industries that have probably reached their cyclical peaks.
Third-quarter results beat lofty expectations. Sales surged $18 \%$ over the year-ago period, to $\$ 13.5$ billion, and edipsed our $\$ 13.0$ billion call. The top line was driven by higher volumes aross all three segments. It hel ped Caterpillar overcome a rise in transportation and manufacturing costs, which reflected increased material expenses (especially for stell) due to tariffs. Freight costs advanced because of supply chain efficiencies, as the industry continues to respond to strong global demand. Altogether, Caterpillar reported a
velopment: $5.1 \%$ of sales. 2017 depreciation rate: $9.1 \%$. Has about 98,400 employees. Officers \& directors own less than $1.0 \%$ of common stock; State Street, 8.3\%; The Vanguard Group, 7.3\% (4/18 proxy). Chairman: Douglas R. Oberhelman. Chief Executive Officer: Jim Umpleby. Inc.: DE. Addr.: 100 Northeast Adams St., Peoria, IL 61629. Tel.: 309-675-1000. Web: www.caterpillar.com.

47\% sharenet gain over the year-ago period, to $\$ 2.86$, which beat our $\$ 2.81$ estimate. This was the best third-quarter profit performance in the company's long history. Despite the solid showing, the aforementioned geopolitical factors likely led Caterpillar to maintain its 2018 adjusted profit-per-share outlook of \$11.00$\$ 12.00$. This seems somewhat conservative, leading us to modestly raise our topand bottom-line estimates, to $\$ 54.40$ billion and $\$ 11.60$, respectively. Due to pentup demand, sales and profit comparisons should be favorable in 2019.
The recent share price serves as a potential entry at a favorable valuation. The stock had been on a two-year run and even established a new all-time high earlier this year, but has since fallen roughly $30 \%$ in price as investors have grown wary of a potentially prolonged trade war. Due to this moderation, CAT stock is trading at a P/E multiple (10.8x) that is well below the level we expect out to 2021-2023. M oreover, the issue's 3- to 5year total return potential eclipses that of the Value Line median.
Dominic B. Silva
